# Waldorf

## Regional Schools' Conference

February 18-20, 2012

### *Enhancing Creativity in Teaching with Dennis Klocek*

The task of teaching requires balancing three different domains in order to keep the creative juices flowing in the classroom. Dennis will address working with students, parents, and colleagues by describing meditative exercises that can be used to develop creative strategies. Topics will include the pedagogical law, approaches to curriculum, developing living picture thinking, the sentient body and the maturation process, the role of discipline, sleep and dream, and the formation of leading questions.

Other guest presenters will include Robyn Hewetson of New Zealand, who will speak to "Verses and Curses: Working with the Healing Power of the Word;" Bruce Mehrrens and Eva Eggenstein of Switzerland, who will share their work with "The Healing Power of Imagination: the Expressive Arts Method in the Classroom," as well as local contributors.
